life-changing technology

The open sound experience to celebrate life all around you

With traditional hearing aids you can miss important sounds, like someone talking next to you or a child calling you from behind. This is because these hearing aids are designed to only focus on the sound in front of you, and block out everything else. Building on Oticon's BrainHearing™ philosophy, Oticon Zircon balances sound from all directions, while keeping speech clear, letting you comfortably locate and focus on what you want to hear. This is the open sound experience.*

Delivers 360° Speech

Thanks to groundbreaking technology, Oticon Zircon delivers 360° speech and clear sound from all directions, even when in noisy environments, so you can focus on the sounds you love.

*OpenSound Navigator™ is only available in Zircon 1.

“ DID YOU KNOW?

Sound and speech from all sources are crucial to the brain's natural way of working. That's why Oticon Zircon delivers an open sound experience, so you can enjoy excellent sound quality and support your brain's health.

Why do you need to hear multiple sounds?

Living with a hearing loss can be frustrating. Not hearing someone next to you, not being able to follow a conversation nearby - it can be isolating and make you withdraw. But it can also be bad for your brain, because you need access to all sounds for your brain to perform optimally. The open sound experience helps your hearing and your brain to stay healthy by giving you access to the relevant sounds around you.

Help your brain with BrainHearing™ technology

Improving your hearing has many positive effects. Treating hearing loss is proven to enhance people's quality of life in many ways, including easier listening, improved understanding, and the ability to remember more.

Connect with sounds all around you

Oticon Zircon has lots of great options so you can connect with more sounds and stay in control.

Apple, the Apple logo, iPhone, iPad, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android, Google Play, and the Google Play logo are trademarks of Google LLC.

Direct streaming
