

INTELLIGENT TODAY SMARTER TOMORROW

WIDEX EVOKE™
HEARING HAS EVOLVED

YOU CAN SHAPE THE WORLD'S FIRST **TRULY SMART** HEARING DEVICE

Now the quality of your hearing experience can evolve in real time and in real life.

Your WIDEX EVOKE™ hearing instruments offer interactive options that help you intuitively shape your listening experience anywhere, so you can easily take control. And if you prefer not to take control, EVOKE automatically adjusts to your real-life needs within your real-world environment.

With Widex EVOKE, you don't miss a single moment.

WIDEX EVOKE™ comes in a wide range of models to suit your needs, preferences and lifestyle.

SMARTER **TOMORROW**

Every time you interact with Widex EVOKE™, it improves. For example, if you personalize your sound settings at your favorite restaurant, EVOKE™ will learn from that and know to provide the same listening experience for you every time you visit that restaurant.

Widex will then use this anonymous data from wearers around the world to keep updating the SoundSense Technology in EVOKE™, so that it gets even smarter over time. Never before has a hearing device been able to create a network of wearers that will help build a better, smarter hearing tomorrow.

KEEPS UP WITH **YOUR** LIFE

EVOKE™ knows the difference between classical music and contemporary music, and how a meeting room sounds different than a social gathering — like a party. It keeps up with you everywhere — mapping your environment and adjusting accordingly. Because the sounds you're exposed to are always changing, EVOKE™ automatically reacts to the environment around you — smoothly and in real time.

EASY. INTUITIVE. TAILORED.

Want an even more personalized sound? Teach EVOKE™ how you prefer to hear with a few taps on the EVOKE™ app. The SoundSense Learn function gives you two sound profiles to choose from. Simply listen to them and select the sound you prefer — as many times as you want. It has never been easier to improve your hearing in everyday, real-life situations.

HEAR **EVERY** MOMENT

When it's noisy, you need your hearing instrument to filter out anything that can distract you from hearing speech. But in quiet situations you want to hear all the subtle details. EVOKE™ has a built-in controller that sets the optimal sound for different sound environments. Now you can experience what's happening in each real-life moment and never miss out.

LIFELIKE SOUND, NATURALLY

Every sound, like the trickle of water or the crunch of leaves under your feet, has its own nuances. And the more lifelike the sound, the easier it is to hear. That's why we've given EVOKE™ the most natural sound you can get from a hearing instrument.

YOU MIGHT **FORGET** YOU'RE WEARING IT

EVOKE™ intelligently learns from the volume changes you make and gradually applies them to similar situations — even if you're in a totally new environment. With its built-in SoundSense Adapt technology, EVOKE is so intelligent, you might forget you're wearing it!

ONE PROGRAM TO FIT **ALL**

When you'd rather hand over control of your sound settings, try the Universal program and let it automatically adjust to the sounds around you using its built-in Fluid Sound Analyzer and Controller. Ideal for fully enjoying the moment with enhanced hearing, naturally.

EVOKE™ APP

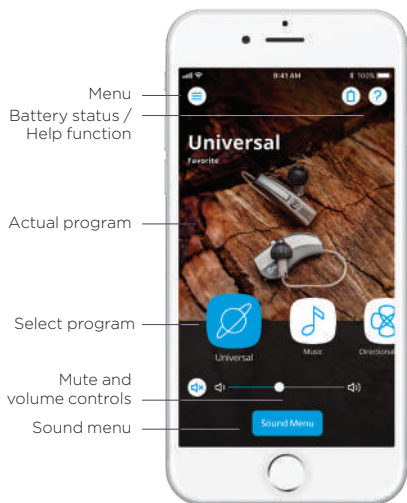

GUIDES YOU TO **PERSONALIZED** HEARING

Refine your hearing in real life by listening to two sound profiles with the EVOKE app and choosing which you prefer: A or B. The more times you do it, the more EVOKE™ learns about how you want to hear at that moment. You can then save your preferences as a program and use it the next time you are in the same environment.

In addition, the EVOKE™ App allows you to:

- Mute or adjust hearing aid volume and use the equalizer to adjust sounds
- Create personal programs with your own names, photos and sound adjustments
- Add locations to programs and locate your hearing aids if lost
- Balance the streaming versus surrounding signals when actively streaming through made-for-iPhone direct streaming.

The EVOKE™ app is for the EVOKE™ F2 smartphone-compatible model.

Download the app in:

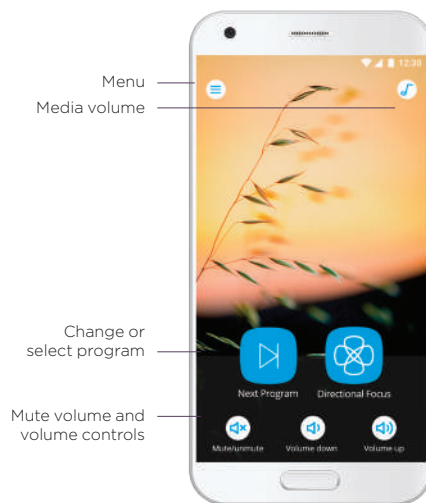

TONELINK™ APP

GIVES **EASY CONTROL** OF KEY FUNCTIONS

Turn your smartphone into a remote control to easily change programs, adjust volume, mute and change directional focus. TONELINK's simple interface is right at your fingertips, and adjustments become a naturally integrated part of daily life. There's no need to carry separate assistive listening devices or to touch the hearing instruments. The TONELINK app is for all EVOKE™ models*.
